## **DETAILED ACTION**

## REQUIRED SPECIES ELECTION

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A (claims 3, 5, 14, 15, 23, and 24): the three-dimensional structure is the tyrosine kinase domain of the IGF1 receptor described by the coordinates of Appendix A,

Species B (claims 7, 17, and 26): the three dimensional structure of the tyrosine kinase domain of the IGF1 receptor is selected from the group consisting of an ATPbinding pocket, a peptide substrate binding grove, a hinge region on the backside of the kinase domain, and an alpha helix C.

The species are independent or distinct because: Species A is limited to the entire three-dimensional structure of the tyrosine kinase domain of the IGF1 receptor described by the coordinates of Appendix A, and is representative of the entire tyrosine kinase domain of IGF1. In contrast, Species B is limited only to the three-dimensional structure to the subdomain selected from the group consisting of an ATP-binding pocket, a peptide substrate binding grove, a hinge region on the backside of the kinase domain, and an alpha helix C. As such, species A and species B are mutually exclusive. Further, the search required for all the above identified species would not be coextensive in scope and therefore present an undue burden of search if searched together.

Application/Control Number: 10/632,139

Art Unit: 1631

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 4, 6, 8-13, 16, 19-22, and 27-32 are

generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

## Conclusion

Any inquiry of a general nature or relating to the status of this application should be directed to Legal Instrument Examiner, Tina Plunkett, whose telephone number is (571) 272-0549.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric S. DeJong whose telephone number is (571) 272-6099. The examiner can normally be reached on 8:30AM-5:00PM.

Art Unit: 1631

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ardin Marschel, Ph.D. can be reached on (571) 272-0718. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system

Application/Control Number: 10/632,139

Art Unit: 1631

provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center at (800) 786-9199.
